Every Month is Career Exploration Month for PhDs

Welcome to Every Month is Career Exploration Month for PhDs. Each month we'll offer programs, feature articles through our listserves [1] and create opportunities for graduate students and postdocs to more thoroughly explore a different career path. Want to learn more? Sign up to our listservs [1]!

Below, you can also click on the link for curated resources about a particular career path. Read about scientists who have made the transition, use the MyIDP tool to assess if your skills, interests and values are a good fit for that career path, and learn about the types of organizations that hire. Want to discuss your career exploration further? Schedule a 20 minute mini-appointment with Program Director Patti Meyer to get started! [2]

Annual Career Exploration Cycle

- January: Industry Research Series
