

July 25, 2016

Dear Members of the Search Committee:

It is with great enthusiasm that I submit this application for the tenure-track Assistant Professor position in the Department of \_\_ at the University of \_\_. Having completed my Ph.D. in psychology at the University of California, San Francisco in 2011, I am currently a postdoctoral scholar at the University of California, San Francisco School of Medicine. I am devoted to cutting-edge health psychology research to improve the psychological and physical well-being of individuals.

As you will see in my materials, several aspects of my background make me a particularly strong candidate: a) extensive training in grant writing and research design at both UCSF and at a competitive 2-week course by the NIH; b) attending top research programs; c) working with some of the best scholars in their respective fields; d) teaching 15 semesters including, at University name, being the main professor for Introduction to Psychology as well as helping to lead an honors research methods class for two years; and e) publishing research in top journals.

I am thoroughly dedicated to teaching and mentoring, and have demonstrated a strong track record of success in this area, as my teaching statement highlights. I would especially enjoy teaching classes about introduction to psychology, social psychology, positive psychology, emotion, and research methods (especially for students writing up their own independent work). Regarding mentorship, I look forward to involving students in my current research as well as collaborating with students to develop and test new ideas.

I have enclosed my curriculum vitae as well as statements briefly describing my research and teaching. I look forward to providing any additional supporting materials, and to speaking by phone or in person about my qualifications for the Assistant Professor position. Thank you for your consideration.

Sincerely,

Mary Calkins, Ph.D.

Postdoctoral Scholar  
University of California, San Francisco  
Department of Medicine  
San Francisco, CA 94143
