About Nevro

Nevro is a medical device company headquartered in Redwood City, California. We have developed HF10™ therapy, an innovative, evidence-based neuromodulation platform for the treatment of chronic pain.

We started with a simple mission to help more patients suffering from chronic pain. At each stage of development, our research was subject to the highest levels of scientific rigor, resulting in a new therapy that has advanced the state of spinal cord stimulation (SCS).

The Nevro® Senza® SCS System received CE mark in 2010, TGA approval in 2011, FDA approval in 2015, and is commercially available in Europe, Australia, and the United States.

Overview

Nevro is seeking a Data Analyst Intern who will be responsible for turning data into information, to provide insight into data trends to assist in making business decisions. This role will also support various ad-hoc projects.

Role Requirements

- Working towards an M.S. or B.S., 1-2 years relevant experience

Skills and Knowledge

- Excellent communication and interpersonal skills.
- Technical expertise regarding data models, database design development, data mining and segmentation techniques
- Highly motivated and able to thrive and think clearly under pressure and tight deadlines.
- Detail oriented, organized, and demonstrated ability to multi-task and shift priorities quickly, while maintaining control with limited supervision.
- Strong attention to detail and understanding of business processes.
- •eam player with a positive attitude, strong work ethic, and a focus on business issues.
- Advanced knowledge of Excel and Powerpoint.
- Knowledge of Python Programming
